B531

THE

ELECTRICAL WORLD

A WEEKLY REVIEW OF CURRENT PROGRESS IN ELECTRICITY AND ITS PRACTICAL APPLICATIONS

VOLUME XLVII.

JANUARY 6 to JUNE 30, 1906.

NEW YORK:
ELECTRICAL WORLD

INDEX TO VOLUME XLVII.

GENERAL INDEX.

Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference.)

A

Abner Doble Co., 795
Accelerometers. By Trotter, (D.) 675, (D. R.) 794
Accident statistics and supervision of electric installations. By Passavant, (D.) 164
Adirondacks, Hydroelective development in, 810, *819
Adjustable Fixture & Mfg. Co., 838
Advertising. (See Central station sale of current.)
Advertising Mirrorgraph Co., 1311
Air, Dielectric strength of. By Russell, (D.) 417
Air heater, Green, *126
Alcohol engines, 443
Alkali industries in Europe, Development of. By Kershaw, (D.) 1001
Alliance Against Accident Frauds, 189
Allis-Chalmers Co., 580 1047, 1090
——New shops, *839
Alloys, Hensler magnetic, Tentative theory of, 138
Alternating-current circuits, Protection of (D.) *118
Alternating-current instruments, Iron core. By Sumpner, *532.
Alternating-current magnets. By Lindquist, *1295
Alternating currents:
——Apparatus for demonstrating phenomena. By Simons, (D. R.) 1307
——Physiological effects. By D'Arsonval, (D. R.) 1044
——Rectifying. By Rosling, (D) *486
Alternators:
——Alexanderson self-exciting, *334
——Design of. By Wittek, (D. R.) 415
——Design of turbo-alternators. By Meyer, (D.) 374
——Felton & Guilleaumme-Lahmeyer construction, (D.) *283
——Grounding the frames of alternators, 693
——Hopkinson test of two-phase alternators, *782
——Leads for alternating-current machines, *782
——Parallel operation of. By Reynolds, 936; Elkins, 1137
——Parallel operation of, Automatic, *52
——Reducing speed, 273
——Self-exciting alternator, 233, *245
——Self-synchronizing, 1187
——Speed characteristics and control. By Scott, (D. R.) 1041
——Speed control, Jackson, *1347
——Speed regulation for operation of alternators in parallel. By Neel, (D) *673
——Turbo-alternator for Glasgow, Scotland; *121
——Vector diagrams. By Niethammer, (D. R.) 415
——Voltage regulation of. By Legros, (D.) 530, (D. R.) 672
Aluminum production in Europe, 313
American Electrical Salesmen's Association, 204
American Electrochemical Society, 908, 992
American Institute of Electrical Engineers:
——Annual convention, 812
——Building funds, 102, 552
——Chicago branch, 188
——Constitution, Proposed new, 767
——Election, 310; By Mershon, Rice, Jr., 831; Mailloux and others, 879, 1083, 906, 976, 1020
——February meeting, 441
——Gift of International Electrical Congress, 813
——January meeting, 244
——March meeting, 651
——Milwaukee convention, 1064, 1097, 1103, 1178
——Nominations, 398, 650
——Proposed trip to England, 238, 1240
——Standardization rules, 234, 1017
American Instrument Co., 745, 798
American Railway Master Mechanics' Association, 1284
American Society of Model Engineers, 980
American Telephone & Telegraph Co., Annual report, 645, 650
American Vibrator Co., 291
Ammeter, Ayrton-Perry-Duddell, (D) *376
Ammonia, Production of, 1192
Ampere's rule, Substitute for. By Burch, (D) *489
Apprenticeship system of General Electric Co., 399
Arc, Electric:
——Investigation of the electric arc. By Stark, Retschinski and Schaposchnikoff, (D) 206
——Negative crater, Size and temperature of. By Reich, (D. R.) 416
Arc lamp lowering gear, (D) *949
Arc lamps:
——Beck flaming, *1158
——Cost of maintaining, 1148
——Design, operation and maintenance. By Henderson, (D) 1050
——Direct-current flame arc. By Mehlke, (D.) 741
——Dynamics of arc lamps. By Simon, (D. R.) 673
Arc lamps: (Continued.)
——Electrolytic arc lamp. By Stadelmann, (D.) 1150
——Excello flaming arc, *379
——Explosion of enclosed, 1142
——Flaming arc compared with enclosed arc. By Elliot, 550, *555
——Flaming arc lamps, 94; By Marks, 1216; Clifford, 1239
——High-voltage arc lamps. By Lux, (D.) 1150
——Juno flame arc, (D.) *742
——Long flame arc lamp. By Andrews, (D.) 1150, 1193
——Magnet coils for, Thomson, 1334
——Magnetite arc lamp, 714
——Siemens flame, *78
——Siemens-Schuckert, *422
——Small carbon arc lamps in Chicago, 466
——Standardization of, (D) 1194
——Starting switch, (D.) *59
——Vogel lamp, (D), *617
——Wiring problems. By White, *47
Architecture of continental power plants. By Koester, *24
Armatures:
——Burning out of coil, 273
——Cutting out damaged coil, 273
——Magnetic induction in. By Ruedenberg, (D.) 617
——Magnetic induction and hysteresis loss. By Thornton, (D.) 833
——Reaction in three-phase generators. By Sumec, (D. R.) 415
——Temperature rise, Estimation of. By Press, 1338
——Testing method. By Brandt, 1139
——Winding direct-current. By Jordan, (D.) 59
——Windings, Representing. By Stembridge, *265, 727; Burke, *474
——Wire, Size of, 732
Asbury Park electric lighting, *1120
Association of Electric Lighting Engineers of New England, 650, 711
Association of Railway Telegraph Superintendents, 1331
Asymmetrical action of alternating currents on a polarizable electrode. By Gundry. (D.) 744
Atlantic City electric lighting, *1117
Atmospheric electricity and trees. By McAdie, *870
Atom:
——Constitution of the. By Lord Rayleigh, (D.) 532
——Number of corpuscles in. By Thomson, (D.) 1307
Atomizers, Electric, (D.) 60
Atwater Kent Mfg. Works, 76
Automobile electric charging service, 351
Automobile mercury-arc rectifier set, *335
Automobile shows in New York, 140, 168
Automobile testing plant of Purdue University, 311
Automobiles:
——Central station work at Rockford, Ill., *366
——Comparison of various motive powers. By McGeorge, (D.) 1262
——Electric automobiles. By Joel, (D.) 164
——Electric-gasoline. By Hospitalier, (D.) 329, 834
——Electric repair automobile, *1157
——Electric trucks for city service. By Eames, (D.) 1041
——Energy consumption of electric carriages, (D.) 793
——England, Electric omnibus in. By Pictou, 1254
——Fuller power vehicle, *677
——Omnibuses for passenger service. By Markham, (D. R.) 1041
——Pieper petrol-electric, (D.) 743, 1084
——Recharging device. By Lyndon, 791
——Testing engines, 1142
——Vedrine machine. By Bary, (D. R.) 574

B

Balancers, Three-wire. By Cohen, *33
Bannister, Lemuel, An appreciation of, 859
Barr, W. J., Mfg. Co., 1200
Barriett Electric Mfg. Co., 422
Battery for electrostatic measurements. By Krueger, (D.) 1086
Battery, Regulating the voltage of lighting batteries. By Alexander, (D.) 1196
Bauxite, Refractory uses of. By Aubrey, (D.) 376
Bearings, Lubrication of. By Mathie, (D.) 1305
Beck Flaming Lamp Co., 1158
Belt fastener, Clipper, *270
Benecke, A. O., *773
Benjamin Electric Co., 621
Berlin Electricity Works, 165
Berlin International Conference on Electrical Units, 648
Bidwell, Benson, 315
Blake Signal & Mfg. Co., 70
Blast apparatus, Electric. By Maurice, (D. R.) 1197, 1307
Blast furnace gas for power, 97
Blast furnace gases, Utilization of. By Freyn, (D. R.) 617
Blast furnaces. By Richards, (D.) 836, (D. R.) 1044, 1307
——Removal of salamander from. By Smith, (D.) 576
Bliss, E. W., & Co., 79, 678, 1090
Block signals of N. Y. C. R. R., (D. R.) 1350
Blood, W. H., Address by, 1176
Blowers, High-pressure, *335
Boiler efficiency tests. By Hanchett, 454
Boiler house economy. By Bennie, (D.) 60
Boiler room losses. By Orr, (D. R.) 1151
Boiler-tube cleaners:
——Centrifugal, *159
——Liberty, *70
Boiler water softening. By Snow, (D. R.) 164
Boilers:
——Priming caused by poor circulation, 929
——Reducing cost of water, *46
Bolts, Hanger. By Tweedy, (D.) 164
Book reviews.
——Abstimmung Funkentelgraphischer Sender. By A. Slaby, 795
——American Newspaper Annual, 1154
——American Telephone Practice. By K. B. Miller, 1197
——Aufgaben der Photochemie. By R. Luther, 121
——Berechnung und Entwurf Electrische Machinen. By F. Neithammer, 1088
——Bookkeeping by Machinery. By E. W. Thompson, 884
——Construction of Hydraulic Mortars. By H. L. Chatelier, 1154
——Drahtlose Telegraphie. By Dr. Eugen Nesper, 836
——Dynamo Design. By A. Press, 209
——Electric Power Transmission. By Louis Bell, 1154
——Electric Wiring, Diagrams and Switchboards. By Newton Harrison, 577
——Elektrische Bogenlicht. By W. B. von Czndnochowski, 378
——Elektrische Kraftubertragung. By W. Philippi, 210
——Elektrischen Bogenlawpen. By J. Zeidler, 577
——Elektrischen Druckknopfsteurungen für Aufzuge. By A. Genzmer, 1044
——Elektrochemie. By H. Dannul, 67
——Elektrochemie der Organischen Verbindungen. By W. Löb, 577
——Elektrolyse Geschemolzener Salze. By Richard Lorenz, 121, 1197
——Elementary Course in Mechanical Drawing. By A. W. Chase, 67
——Experimental Researches on the Flow of Steam Through Nozzles and Orifices. By A. Rateau, 676
——Formelzeichen. By Olof Linders, 578
——Fowler's Electrical Engineers' Year Book, 1265
——Funken von Kommutatormotoren, 954
——Gas Engine Design. By C. E. Lucke, 66
——Handbuch der Angewandten Physikalischen Chemie, 410
——High-Tension Power Transmission, *953
——History of Stevens Institute, 1044
——Hypochlorite und Elektrische Bleiche. By Emil Abel, 883
——Illustrated Technical Dictionary, 1265
——Instrumente Zue Messung der Temperature fur Technische Zwecke. By Otto Bechstein, 210
——Lecons d'Electrotechnique Générale. By P. Janet, 577
——Le Four Electrique. By A. Minet, 577
——Les Enroulements Modernes. By A. Meynier and H. Nobiron, 620
——Machine Design. By F. R. Jones, 490
——Management of Accumulators. By Sir David Solomons, 1307
——Practical Electric Railway Handbook. By A. B. Herrick, 1197
——Séparation Electromagnétique et Electrostatique des Minerais. By Désiré Korda, 378
——Standard Telephone Wiring. By J. F. Fairman, 1197
——Steam Engine Indicator and Indicator Diagram. By W. W. Beaumont, 1197
——Steam Turbines. By W. Gentsch, 1044
——Steam Turbines. By A. Stodola, 287
——Synchronous and Other Multiple Telegraphs. By A. C. Crehore, 1154
——Telegraphist's Guide. By J. Bell and S. Wilson, 577
——Telephony. By A. V. Abbott, 1153
——Theorie der Elektrizität. By M. Abraham, 577

*indicates illustrated articles.

150654

Book reviews: (Continued.)
——Théorie Moderne des Phénomènes Physiques. By A. Righi, 578
——Traite Pratique d'Electrochemie. By Richard Lorenz, 287
——Universal Electrical Dictionary, 1088
——Whittaker's Electrical Engineers' Pocket Book, 1044
——Wiring Handbook. By C. P. Poole, 1197
Boosters:
——Automatic, in power plants. By Schroeder, (D. R.) 743; Tilmey, (D.) *416
——Lancashire automatic reversible. By Turnbull, (D.) *488
Boston Edison Co.'s work in Wellesley, 708
Boston meeting of illuminating engineers, 652
Brakes, Electric railway (D.) *206
——English tests. By Fell, (D.) 374
——Failure of, on street railways. By Kramer, (D. R.) 1041
——Krebs electric dynamometer, (D. R.) 378
Branding apparatus, Electric, *746
Bridge, Transporter over river Mersey. By Webster, (D.) 834
Bristol Co., 886
British Physical Laboratory, (D.) 835
Brown, L. P., & Co. Chicago, 746
Brush contact resistance. By Mandi, (D.) 205
Brush holders, Construction of. By Zingelmann, (D. R.) 374
Brushes, Troubles with, 273
Buffalo Electric Co., 56
Building of Engineers' Club, New York, *1031
Bulkhead doors electrically operated, *579, 1156
Bureau of Standards, Receipts of, (D.) 208
Burglar alarms, Windsor. By White, 1139
Burglar insurance in Dubuque, 198
Burnett, Douglass, *1068
Bushings, Strain, *336
Business methods. (See Central station sale of current.)

C

Cable clamps, *886
Cables:
——Calculation of electric feeders. By Rhodes and Watson, (D.) 119
——Devices indicating whether a conductor carries current, (D.) 418
——Laying N. Y. C. cables, *1201
——Locating grounds in. By D'Eustachio, *937
——Rubber covered cables, 906
——Rubber insulated, without lead. By McLean, 1081
——Splicing electric cables, 466
——Standard underground cable practice, 902
——Standardizing conductors, (D.) 1085
——Three-phase, high-tension French cable, (D.) 744
——Underground mains. By Black, (D.) *285
——(See also Wires and wiring.)
Cables, Telephone and telegraph:
——Constructions of telephone cables. By Schmidt (D.) 63
——London-Glasgow telegraph cable, (D.) *378
——Testing telephone and telegraph. By Cohnreich, (D. R.) 1153
Cables, Submarine:
——German network, 513
——Pacific Ocean to Japan, 1325
——U. S. Government cables, 771
Cahill, Dr. Thaddeus, *656
Calibrating steam gauges. By Newmaster, 1139
Calibrating watt-hour meters, *444
Calorimeter, Steam, *456
Cams, Stamp mill, and cam shafts. By Stoddard, 1139
Canada, Electric power in, 381
Canadian Electrical Association, 1288, 1330
Canal haulage, Electric. By Perkins, (D. R.) 417; 1305; Block, (D.) *1350
Canal rays:
——Heavy. By Gehrcke, (D.) 835
——In nitrogen and hydrogen. By Stark and Hermann, (D. D.) 418
——Properties of. By Thomson, (D.) 575
Capacity inductance. By Lichenstein, (D. R.) 376
Capstans, Electric. By Davy and Raudot, (D. R.) 164
Carbon:
——Electro-optic properties of, 109
——Granulated, as resistor. By Brown, (D.) 744
——In ferro-alloys. By Offerhaus, (D.) 489
Carbon dioxide recorder, Automatic. By Hallberg, *1218
Carnegie Technical Schools, 141
Carruth brothers sent to prison, 1332
Car wheel acceleration, (D. R.) 793
Cars:
——Gasoline-electric, *323
——Interurban test car, 1191
——Single-phase equipment, (D.) 60
——Single-phase motor car. By Dietl, (D.) 117
Cathode-ray oscillograph, 95
Caustic soda and chlorine, Electrolytic production, 1192
Cells:
——Edison-Lalande. By Arendt, (D. R.) 418
——Standard. By Hulett, (D.) 209
——Thermo-dynamics of cells acted upon by light. By Wilderman, (D.) 1042
Cement plant, Electric power in, (D. R.) 164
Central station commercial statistics, 770
Central station enterprise. By Field, 1149
Central station manager, The over-advised. By Hammond, 944
Central station sale of current:
——Advertising:
Advertising enclosed with bills, 480
Advertising methods, *54; 946. By Marsh, 737; *739, 1256
Central station sale of current: (Continued.)
——Advertising: (Continued.)
Advertising value of a substantial power house, 8
Co-operative advertising by electrical manufacturers, 279
Co-operative worth of salesmen with and without advertising, 733
Follow-up methods for cenral stations. By Rae, Jr., 263; Powers, 948
Good breeding in. By Rae, Jr., 738
Writing contests, 264
——Automobile trip to sell motors. By Caldwell, *954
——Avoca, Pa. By Howard, 1144
——Baltimore development, 1145
——Business methods:
Business methods, 56, 113, 236; By Rae, Jr., 263, 313; Trueauff, 1219
Business outlook, 697
Campaign at Dayton, Ohio, 735
Department of a central station company, 274
Department of Denver, Co., *481
Losing methods, 483
New Orleans methods, 734
Organization and development of business department, 274
Small towns, 186
——"Covering the field," 277
——Earnings at Red Oak, Ia., 977
——Lamp renewal service, 58
——Manager, The over-advised. By Hammond, 944
——Meter reading, *739
——Minneapolis General Electric Co., *1143
——Newspaper advertising. By Rae, Jr., 57
——Office methods, 1123, 1124
——Office methods at Wabash, Ind., 987
——Salesman, Status of, 56
——Securing and retaining business, Methods, 1223
——Sheboygan, Wis., 1100, 1146
——Solicitor, and payment of, 733
——Starting a new business department. By Winlow, 943
——Systematic and continuous presentation of one line of argument, 278
——Up-to-date methods in Texas, 1144
——Uses for central station service, 942
——Ways and means of increasing business in towns under 5000, 921
——(See also Charging for electric current.)
Central station situation, December, 1905, 3
Central station work, Competitions in, 235
Central stations:
——Albany, Ga., Hydro-electric plant. By Hutchinson, *1247
——Architecture of continental power plants. By Koester, *24
——Attractive offices, 484
——Belfast, Ireland, *317
——Beloit, Wis., Business methods, 570
——Belvidere, Ill., 264
——Burlington, Vt., municipal plant, *361
——Burton, Ohio, 464
——Camden, N. J., Oil engines. By Sweet, *1125
——Cedar Falls, Iowa, Wreck and quick repairs, *1148
——Chicago, Fisk street, (D. R.) 165
——Chicago Drainage Canal plant, (D.) 206
——Collinwood, Ohio, municipal plant, 926
——Cologne, Germany. By Prenger, (D.) 488
——Combination lighting and traction plants, 1131
——Condensing plants in small stations, 922
——Connecticut Railway & Light Co.'s system, 1035
——Cost of operation, Effect of day load, 922
——Cost of power. By Griffin, (D. R.) 164
——Dayton, Ohio, business campaign, 735
——Depreciation of electrical properties. By Bissell, 990
——Design:
Common fault in. By Reid, 939
Design of power plants. By Clark, (D.) 743
Hydroelectric power stations. By Rushmore, 648, 670
Small electric power station. By Hobart, 457, *721
——Durham Collieries Electric Power Co., (D.) 416
——Economics of power plant operation. By Stott, 244, 308; Hancock, (D.) 800, 1040; (D.) 1196
Combined railway and lighting plants, 202
Electric auxiliaries. By Mann, (D.) 793
Germany. By Hoppe, (D.) 743
——Efficiency diagrams. By Swinburne, (D) *120
——Electrical connections for power stations, *1133
——Electrochemical processes as station load equalizer, 993
——Elmwood, Ill., Rural district supply, *36
——England:
Chesterfield lighting and traction plant, (D.) 488
First hydro-electric plant in Great Britain, *108
Ipswich. Report, (D.) 1263
Mansfield, (D.) 531
Statistics, (D.) 285, 329
——European stations, Steam and gas power in. By Rubricius, (D.) 284
——Findlay, Ohio, Lighting and steam heating plant, 465
——Galesburg, Ill., central station business, 112
——Gas, Producer, for stations. By Wyer, (D.) 374
——Gas engines:
Germany. By Nagel, *746
Winchester, Ind., *1126
Central stations: (Continued.)
——Germany:
Architecture of plants. By Koester, *24
Statistics, (D.) 574
——Harrisburg, Central Pennsylvania Traction Co., *956
——Hartford Electric Light Co., *447, 463
——Heat, light and power plans at Bryn Mawr College. By Gray, (D. R.) 531
——High tension installations. By Siedek, (D.) *882
——Hillsboro, Ill., *460
——Holyoke, Mass., 97
——Houston, Tex., Lighting & Power Co., *603
——Indianapolis Light & Heat Co., 928
——Italy, at Zogno, *865
——Janesville, Wis., Benefit of cheap power, 510, 527
——Japan, at Osaka, Steam turbine station, *983
——Jordan, Minn., Small lighting plant, (D. R.) 1000
——Kings River Power Co., 1066
——Kokomo, Ind., 928
——Leveling the central station load, 694
——Lewiston, Pa., 920
——Lewiston & Auburn Electric Light Co., 789
——Load factors in the cost of operation, 203
——London:
Charing Cross, West End & City Electricity Supply Co., (D.) 575
London County Council tramways, (D.) 618
New electric power scheme, 322
Power situation. By Minshall, 110
——L. I. R. R., at Long Island City, *1183, *130
——Los Angeles, Cal., 935
——Madison, Wis., Central station notes, 662
——Manchester, Eng., (D.) 952
——Marion (Hackensack River) station of the Public Service Corporation of New Jersey, *17
——Massachusetts. Central station economics in, 39, 111, 158, 256
——Massachusetts statistics, 979
——Meriden, Conn., Combined electric and gas plant, 462
——Milan, Ohio, Municipal plant, 464
——Municipal trading. By Swinburne, (D.) 118
——Nassau, L. I., Light and Power Co., *703
——Natick, Mass., station of Boston Edison Co., *874
——Northern California Power Co., 312
——Norwalk, Ohio, Combination lighting and traction, 1131
——Oil-engine driven plant, Camden, N. J. By Sweet, *1125
——Operating experiences. By Channing, 43
——Output, Suggestions for increasing, 201
——Paris, Saint-Denis station, 352. By Blondin, (D.) 375
——Peaks, Park lighting, 1099
——Pittsfield Electric Co., 111
——Plant City, Florida, *109
——Progress report by J. R. Cravath, 920
——Protection from high voltages, 711
——Public Service Corporation of New Jersey. By Holman, *104, 139, *155, *196
——Relation of load-factor to the evaluation of hydroelectric plants. By Storer, 669
——Rockford, Ill., Automobile development, *366
——Rome, N. Y., 362
——Rural District supply at Elmwood, Ill., *36
——Selling of apparatus. By Meston, 947
——Single-phase apparatus and the small plant. By Jameson, 265
——Sofia, Bulgaria. By Koester, *195
——South Africa, Statistics. By Poole, (D. R.) 1350
——Springfield, Ill., station and system, *252
——Springfield, Mass., United Electric Light Co., 158
——Springfield, Ohio, *1122
——Stations that have "never paid," 237
——Steam turbine station design. By Sniffin, (D.) 284
——Steam turbine station at Osaka, Japan, *983
——Steam turbines at Waterloo Iowa, Test of Curtis turbine, 991
——Storing energy in Olten-Aarburg station. By Herzog, (D. R.) 117
——Switzerland:
Consolidations in. By Weissenbach-Griffin, 568
Montlingen, (D.) 702
——Technical men in central stations, 924
——Testing room, Direct-current. By Johnson, (D.) 320
——Texas enterprise, 276
——Traction current from lighting stations. By Hoppe, (D.) 1151
——Wabash, Ind., Lighting and other central station work, *985
——Warren and Jamestown, Ohio, railway power station, *363
——Washington, Iowa, Reducing operating expenses, 1127
——Watertown, Wis., 711
——West Indies power plant. By Moses, (D.) 119
——Winchester, Ind., Gas engines, *1126
——Yonkers Electric Light & Power Co., 827
——Zurich. By Wagner, (D.) 575
"Central stations gone to seed," 439
Chair for curing seasickness, 192
Charcoal plates, 479
Charging for electric current:
——Beloit, Wis., 570
——Chicago, Report by Arnold and Carroll, 709
——Cologne, Germany. By Prenger, (D.) 488
——Columbus, Ohio. Regulation by a municipality of maximum rates for lighting, 1242

*indicates illustrated articles.

Charging for electric current: (Continued.)
——Combined meter tariff and flat rate. By Poeschl, (D.) 489
——Janesville, Wis., 510, 527
——Lamp hour charges in municipal plants, 945
——London sliding scale, 1260
——Maximum demand system, 712
——Method of determining maximum demand, 1260
——"Non-peak" load rates, 904
——Readiness-to-serve rates, Effect of, on commercial lighting, 603
——Rebates in bills, (D.) 62
——Springfield, Ill., 255
——Tariff reform in London. By Roberts, (D.) 417
——Various aspects of rate regulation, 925
